

Dr Emmanouel Hourdakis

Post-doctoral Researcher, Inst. of Nanoscience & Nanotechnology
"Energy Harvesting & Autonomous Sensors" Group

Emmanouel Hourdakis received his Physics diploma from the University of Crete in 2001, his Masters degree in Physics from the University of Maryland in 2004 and his PhD degree from the University of Maryland, in collaboration with the National Institute of Standards and Technology (NIST) in 2007. Since 2009 he joined the Institute of Microelectronics (now Inst. of Nanoscience & Nanotechnology) at the National Center for Scientific Research "Demokritos" where he currently works as a post-doctoral researcher in the "Energy Harvesting and Autonomous Sensors" group. His research interests focus on the electrical characterization of materials, the study of nanostructured materials and the design, fabrication and characterization of microelectronic devices, sensors and systems. More specifically, his focus recently is on the development of integrated energy harvesting and energy storage devices as well as the creation of low-power and autonomous sensors for Internet of Things (IoT) applications. His work, so far, has led to 35 journal publications, 22 conference presentations, 3 of which were invited and 1 book chapter. He has worked on several EU and national projects and has been the scientific coordinator in one of them. He has trained a large number of students and has co-supervised one PhD thesis. He acts as a reviewer for seven international journals and has been a member of the organizing committee for 3 international and one national conferences.
