Marina Stramarkou was born in Athens, Greece on 31/07/1992. She received her Diploma (equivalent to Master of Engineering) from the School of Chemical Engineering of National Technical University of Athens (NTUA) in 2016. Her Diploma Thesis entitled "Development of microalgae extracts and study of their bioactivity and antioxidant potential" was performed in the Laboratory of Process Analysis and Design (NTUA). During 2018-2020 she performed the Postgraduate Program "Techno-economic Systems" at the School of Electrical and Computer Engineering of NTUA. Since December 2016, she performs her doctoral dissertation at the National Center of Scientific Research "Demokritos" (NCSR "D"), in collaboration with NTUA, under the "Industrial PhD" program of the NCSR "D" sponsored by the Stavros Niarchos Foundation. The title of her PhD Thesis is «Smart Packaging using electronic sensors on flexible substrates for the activation of food bioactive compounds encapsulated with innovative methods». She has published 10 articles in International Scientific Journals, a book chapter and an e-book chapter and she has done 14 presentations in International Scientific Conferences. She has attended many seminars, such as TOP STARS 2017 EIT Raw Materials Winter School (10 ECTs) at the University of Trento in Italy (2017) and EIT Food Seminar "Algal biotechnology techniques and opportunities for sustainable bio economy course" at the Institute of Biotechnology Fraunhofer (2018). She has been awarded under the Eurobank EFG sponsorship for achieving the highest School Certificate degree in 2010 and has also won the Thomaidis award for publishing her Research in Conference/ Journal with Reviewers (2016, 2017, 2019, 2020).
