

CURRICULUM VITAE

Last name : Pilatos
Name: George
Date of Birth : 28 / 8 / 1972
Home address : Aeginis 4 - N. Ionia, P.C. 14232
Military Obligations : Fulfilled (S.E.M.)
Contact: 210 6503913, 6975934111
e-mail: g.pilatos@inn.demokritos.gr

EDUCATION - PROFESSIONAL EXPERIENCE

| | |
|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <u>Mar. 1997</u> | Diploma in Chemical Engineering, NTUA (Sector IV : Synthesis and development of industrial processes) The thesis was carried out in collaboration with the laboratory of Mesl of the National Research Center Demokritos. |
| <u>June 1997 – Mar. 2007</u> | N.C.S.R "Demokritos" Laboratory of membranes and microporous materials for environmental separations (MESL). Support of research with research contracts in Greek and European research and development projects with experience in activated carbon, development of toxic gas filters, gas separation membranes, design, construction and operation of experimental devices and pilot plants for the production of activated carbon and carbon nanostructures (nanotubes, graphene). «New membranes and integrated hybrid membrane systems for vocs removal from industrial contaminated water (nisiw)» (E-10672), under the scientific responsibility of Dr. Nikolaos Kanellopoulos for the period from 1-1-2000 to 30-9-2000. «Visible – light curable latex and heavily pigmented coating systems» (E-10477), under the scientific responsibility of Dr. Nikolaos Kanellopoulos for the period from 1-10-2000 to 31- 12-2001. «Development of ceramic membranes for olefin recovery from liquefied petroleum gases» (E-10898), under the scientific responsibility of Dr. Nikolaos Kanellopoulos for the period from 1-1-2002 to 13-12-2004. «INSIDE-PORES – IN SItu study and DEvelopment of processes involving nanoPORous Solids» (E-11195), under the scientific responsibility of Dr. Nikolaos Kanellopoulos for the |

For the period from 12-11-2004 to 12-11-2006.

- "Utilization of Bioactive Metabolites from Marine Algae" (E-11127), under the scientific responsibility of Dr. Nikolaos Kanellopoulos for the period from 30-4-2006 to 14-3-2007.

| | |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <u>Mar. 2007-</u> | N.C.S.R. "Democritos" Organic position I.D.A.H. - Chemical Engineer • NOVELTIES ON CCS-Πρωτοποριακές Τεχνολογίες για την υλοποίηση CCS» (E-1843) under the scientific director, Dr. Georgios Romanos for the period from 11/2013 to 10/2015. |
| <u>Feb. 2014</u> | Promoted to Dr. of Chemical Engineering, NTUA. Thesis Title: "Synthesis and modification of graphitic nanostructures and composites for products with advanced technology applications". |
| <u>Feb. 2017-</u> | N.C.S.R. "Democritos" Permanent position of ELE B' (123/G/14-2-2017) - Chemical Engineer Subject: Synthesis and modification of graphitic nanostructures and composites for the production of products with advanced technology applications - high temperature processes. Programs in progress: <ul style="list-style-type: none">• CARMOF: New process for efficient CO₂ capture by innovative adsorbents based on modified carbon nanotubes and MOF materials (1/2018 – 12/2021).• INNOMEM: Open Innovation Test Bed for nano-enabled Membranes - Starting date: 01/05/2020, Duration in months 48. |
| <u>Dec. 2021</u> | <u>Publications in international peer-reviewed journals</u> <ol style="list-style-type: none">1. Ketikis P., Damopoulos E., Pilatos G., Klonos P., Kyritsis A., Tarantili P.A., Preparation by solution mixing and characterization of condensation type poly(dimethylsiloxane) / graphene nanoplatelets composites, Journal of Composite Materials (2022) 56(2) 251-266.2.
