

Spyridon Katsantonis

Chemical Engineer, PhDc

Athens, Greece

s.katsantonis@inn.demokritos.gr

Spyridon Katsantonis received his Diploma (MEng) in Chemical Engineering from the National Technical University of Athens (NTUA) in 2020, specializing in Materials Science. He is currently a PhD candidate at NTUA and conducts his research in collaboration with the “Energy Harvesting and Autonomous Sensors” group at NCSR “Demokritos”. His main research interests revolve around the synthesis of thermoelectric nanomaterials for 3D printing applications as well as the design and fabrication of thermoelectric generators. Regarding his PhD research thus far, he has participated in 2 International Scientific Conferences.
